

**ENSURE ELECTION INTEGRITY**  
**OR**  
**HOW TO STOP VOTER FRAUD**

**WHAT IS VOTER FRAUD?**

**Voter Fraud is the illegal intervention of the election process to affect the vote counts either to:**

- **Increase the vote share of the favored candidate.**
- **Depress the vote share of the rival candidate.**

# How Can People Register to Vote?

- **By Mail**
- **In Person**
- **Via Deputy Registrar**
- **At Motor Vehicle locations**
- **Voter Registration drives**

# Registration Fraud

- **Registering false voters such as the deceased or even fictitious persons. This type of fraud can occur in voter registration drives, especially those conducted in third-party voter registration efforts like those involving ACORN.**

# What Can Be Done to Prevent Registration Fraud?

- **Purge voter registration file. Remove illegal aliens, prisoners, dead people and non-citizens from voter rolls.**
- **Develop systems that will automatically update registration files when someone dies, goes to prison or does not have SS #.**
- **It is inexcusable that of the precious few requirements the Constitution sets for voting in America, our government doesn't check for the most basic one — citizenship. The surest way to know that a person is a citizen is to confirm that he's in the SSA database.**

# How Can People Vote?

- **Military by Mail (absentee voting)**
- **Non Military by Mail (absentee voting)**
- **Early Voting in Person**
- **Election Day Voting in Person**

# Voter Fraud

- **Challenging the registration status of voters to potentially prevent them from voting in an election.**
- **Voting by those who are not legally qualified to vote because they are underage, not registered, not a citizen, etc.**
- **Stuffing Ballots (Acorn)**
- **Voting more than once.**
- **Selling a vote, or trading a vote.**

## **Voter Fraud (Cont'd)**

- **Voter impersonation.**
- **Intimidation of voters that prevents them from voting or alters their vote.**
- **Buying or coercing votes. More likely to happen with Absentee voting as the voter does not have the protection and privacy of the polling location.**
- **Tampering with software &/or hardware of a voting machine to alter vote totals.**

# **What Can Be Done To Prevent Voter Fraud?**

- **Voter ID.**
- **Poll Watchers at all polling locations throughout election. We did poll watching for the primary elections. We had 26 poll watchers go to multiple polls to observe.**
- **Complete evaluation of existing Election process end-to-end to ensure it is complete, efficient, no gaps in process and appropriate number of checks and balances.**

## **What Can Be Done To Prevent Voter Fraud? (Cont'd)**

- **Purge voter registration files so only legal voters are registered.**
- **Vigorously prosecute all cases of voter fraud**
- **Various forms of statistics can be indicators for election fraud. E.g. Number of voters who signed in vs. total voter count on machine**  
**Complete**

## What Can Be Done To Prevent Voter Fraud? (Cont'd)

- **End-to end auditable voting systems provide voters with a receipt to allow them to verify their vote was cast correctly, and an audit mechanism to verify that the results were tabulated correctly and all votes were cast by valid voters.**
- **Testing and certification of election equipment can prevent voting machines from being a black box where voters cannot be sure that counting inside is done as intended:**

**America must have election systems that are fraud-proof!**

**This can only happen if “We The People” get involved and force the issue until it is resolved.**

# **How Can I Help Ensure That Only One Vote Is Allowed Per Citizen and only Citizens can vote?**

- 1. We need 20 + Data Researchers.**
- 2. We need 15 people who are willing to document the total election process in Smith County, so we can identify all points of exposure.**

# **What does this involve?**

**Some examples.**

- **Determining if prisoners are removed from registration lists, if so, how, when and how often?**
- **How do our State license locations validate voters who register? What rules do they follow? How does this information get to the elections office? How often is data sent? What checks and balances are in place to ensure the data is received by elections office?**
- **What validations are done by the election office for those who register and vote by mail?**
- **How do they purge the registration list, how often?**

**Those are just a few of the many questions that we need to answer.**

**You will in effective be a detective trying to determine where fraud could take place and how to prevent it from happening again.**

**We will work as a team to identify where to look, who to contact and use whatever information is currently available.**

**The effort will be exciting and rewarding and you will be helping your county and state ensure every citizen's vote counts and that non-citizens do not vote.**

**We will train you and provide ongoing support.**

## **Our Objective**

**To make Smith County the County that everyone looks to for information and advice on how to prevent voter fraud.**

**Please join us as we strive to meet our objective.**

**Without YOU, we cannot succeed. With YOU we cannot fail.**
