# POSSE+PLUS MISSION

---

- The mission of the Posse+Plus program is to train every willing individual in Wood County to prepare for survival during and rebuilding after a TEOTWAWKI (The End Of The World As We Know It) scenario.
- Volunteers with the Posse+Plus program strive to lessen the impact of a TEOTWAWKI scenario on the people of Wood County Texas. Without proper training and preparation experts say up to 90% of the population could be dead within the first year of the most serious TEOTWAWKI scenarios.
- The Posse+Plus program accepts the reality that federal and state resources are limited and cannot be depended on for survival, medical care, or the security of the people of Wood County during and after a TEOTWAWKI scenario. People instead will have to depend on themselves, their families and friends, and the other good people of Wood County Texas.

# TEOTWAWKI THE END OF THE WORLD AS WE KNOW IT

---

- A TEOTWAWKI scenario is one that leads to the long-term and wide spread destruction of systems and infrastructure needed to sustain modern healthy lives.
- A TEOTWAWKI scenario could consist of a lengthy series of cascading events leading to wide spread destruction or one sudden momentary event.
- A lengthy series of cascading events allows some time to prepare to some degree before the full destructive effect of the scenario is realized, however many people even fail to recognize that the TEOTWAWKI scenario has already begun and fail to act.

# TEOTWAWKI (CONTINUED)

---

- A sudden momentary TEOTWAWKI scenario could destroy most systems and infrastructure in the blink of an eye. Any hope of preparation ends in an instant. The destruction of these systems and infrastructure could result in massive loss of life in Wood County Texas and recovery could take years or decades.
- There is also a tendency for many, if not most people, to deny the possibility that a TEOTWAWKI scenario could occur or is occurring. Others who embrace the idea that a TEOTWAWKI scenario could occur or is occurring are often marginalized and ridiculed, making it difficult to motivate the general public to act in their own self-interest. This is the curse of the sentinels, people with sentinel intelligence, a special cognitive capacity that allows someone to detect threats before most other people.

# TEOTWAWKI (CONTINUED)

---

- The Posse+Plus program leverages the increasing awareness of the good people of Wood County Texas that the world as we know it is rapidly changing resulting in largely negative outcomes, and perhaps ultimately leading to a TEOTWAWKI scenario.
- Fewer people feel comfortable with a normalcy bias that has served them well in the past and more people are open to learning and preparing for an uncertain future.
